PRESS RELEASE

KNEIP EXPANDS ITS BUSINESS CONTINUITY AND DISASTER RECOVERY PLAN

Luxembourg, 6 December 2005 – KNEIP, European leader in the communication of investment fund information, announced today the further development of its Business Continuity and Disaster Recovery Plan (BCP/DRP) in cooperation with Synstar, a Hewlett-Packard subsidiary.

KNEIP has pushed its security level one step further by increasing bandwidth and capacity of its external replication and redundancy processes at Synstar's Business Recovery Centre. The latter provides a highly secure environment enabling a direct recovery of activities should an interruption of any kind occur.

"We have increased performance of our external redundancy processes to remain available and flexible at all times. We must guarantee the speed and reliability of execution our clients are looking for," explains CEO Bob Kneip.

After its recent successful certification of AICPA's SAS 70 Type I, these new developments in Business Continuity highlight the ongoing commitment of the company to use the highest security standards.

About KNEIP

Founded in 1993, KNEIP specialises in the communication of investment fund information. With 105 employees, the company delivers integrated services for the publishing of net asset values and financial notices, as well as the production of financial reports.

Headquartered in Luxembourg with a subsidiary in Switzerland, KNEIP provides services to more than 180 international fund promoters and administrators, representing about 9,000 funds in 15 jurisdictions.

About Synstar

Synstar International, a Hewlett-Packard subsidiary, is a leading provider of Business Continuity Services in Europe. Synstar has provided these services for over 19 years, covering over 500 incidents with a 100% success rate in helping customers getting back to business-as-normal. Synstar won the CIR Business Continuity Service Provider of the Year Award 2004.
